

ARE YOU READY FOR YOUR FIRE INSPECTION?

- The Fire Safety Division is empowered, by New Jersey Regulation, to order the abatement of cited fire hazards, to assess penalties for non-compliance, and to issue punitive closing notices and vacate buildings where uncorrected hazards exist.
- Fire safety inspections generate formal, written Notices of Violation, which are issued to the individual responsible for the correction of an observed fire hazard.
- Re-inspections are established and are conducted.
- There is a process that is followed for granting extensions of time for hazard abatement, as well as handling uncorrected cited hazards.
- All fire protection systems are inspected at the frequencies required by the Uniform Fire Code.
- These include automatic sprinkler systems, standpipe systems, fixed suppression systems, fire alarm systems, emergency power generators, fire pumps, fire extinguishers and fire hydrants.
