STUDIES

Master of Arts in Instructional Technology | MAIT
ABOUT THE PROGRAM

The Master of Arts in Instructional Technology is an online program designed to bring the best instructional technologies into both public and corporate settings. With a strong theoretical foundation, the degree enables graduates to improve learning and human performance with the aid of technologies.

Graduates of the MAIT program can become leaders in the fields of education and training and may qualify for positions in the areas of curriculum design and development, technology coordination, online learning, integration of technology in teaching, human performance support, user-interface design, training development, and project management.

Distinctive online program
In order to maximize the effectiveness of online learning, the MAIT online program will facilitate **optional synchronous meetings** and encourage **online collaboration projects**, so that students will be equipped with strong online collaboration and communication skills as they complete the degree.

The program serves:
• students who seek or will continue employment in a school setting;
• students who wish to pursue coordinator or supervisor positions in P-12 schools and district
• students who seek or hold careers in business, industry, non-profit organizations,
   training-related careers, instructional designers, and higher education professions.

The program is composed of both core and elective courses.
• Core courses: focus on important issues related to learning, instruction, research, and the impact of technology, and include an overview of a variety of technologies.
• Elective courses: designed to extend the core skills into more specialized environments, and to give students opportunities to enhance their personal interests in their chosen field. Students can tailor their courses to their personal interests in their field.

ADMISSIONS CRITERIA

To be considered for admission to the Master of Arts in Instructional Technology program, applicants must submit the following:

- The online application for graduate admission at www.stockton.edu/grad (including an essay describing relevant experience and reason for pursuing MAIT degree),
- Three letters of recommendation, including form that can be found within the online application,
- Official transcripts from all colleges attended, including baccalaureate degree from regionally accredited institution and minimum grade point average of 3.0 (The applicant with lower than 3.0 GPA needs to submit GRE or MAT, see below)

The GRE or MAT is not required for MAIT program applicants with an undergraduate GPA of 3.0 or above, or for those who already possess a master's degree.

If the applicants do not meet the minimum undergraduate GPA criterion of 3.0, applicants are required to submit GRE or MAT score, which might compensate for lower GPA when applications are reviewed. Also MAIT applicants who would like to pursue a Supervisory Endorsement Program need to submit GRE or MAT score in order to take EDUC supervisory courses. The application review will be conducted holistically, so there is no stated minimum GRE or MAT score.

The Graduate Record Examination (GRE) General Exam (School Code 2889) or Miller Analogies Test scores (MAT) (School Code 1391).

Recent Stockton graduates who qualify for Direct Entry into a Stockton graduate program have a streamlined application process. Please visit the Direct Entry website for more information.
