Stockton COVID-19 Updates

Latest Information • FAQ • Resources

- **Reminder:** If you have been tested for COVID-19 in any jurisdiction, due to symptoms or a known direct exposure, please contact Stockton at publicsafety@stockton.edu as soon as possible. You do not need to wait for results. This will greatly assist our efforts in tracking the people in our community who have been impacted.

<https://stockton.edu/emergency-management/coronavirus.html>

- **Pledge Reminder:** Faculty, staff and students should complete the Stockton Health Pledge daily, even if you are not coming to campus. The pledge is emailed daily to your Stockton email and assists us in monitoring the health of our community. *If you are feeling ill, do not come to campus, notify your manager and see your doctor if necessary.*
- For questions about Stockton's response measures, contact Campus Public Safety, at 609-652-4762 or publicsafety@stockton.edu.

Health Services at Galloway Campus

- **NOT FEELING WELL, NEED A COVID-19 TEST?
CALL HEALTH SERVICES AT 609-652-4701 TO SCHEDULE AN APPOINTMENT WITH A
MEDICAL PROVIDER WHO WILL PROVIDE A REFERRAL FOR COVID-19 TEST**
- Stockton students who receive a referral for a COVID-19 test can get tested for free, by appointment only, at AtlantiCare Urgent Care locations in Galloway (110 E. Jimmie Leeds Rd. Galloway, NJ 08205) & Atlantic City (3830 Atlantic Ave. Atlantic City, NJ 08401) with their Stockton ID.
- HEALTH SERVICES- WEST QUAD 108

Office hours: Mon-Fri. 8:30am-5:00pm, Tues. 8:30am - 7:00pm

Clinic hours: Mon.- Fri., 9:00am - 3:40pm, Tues., 9:00am - 5:40pm

(609) 652-4701 | wellctr@stockton.edu
- **Students experiencing a medical emergency should call Campus Police @
(609) 652-4390, or dial 911**
- **Any care needed that is outside the scope of services will be referred to a specialist**

Atlantic City Campus

Stockton students who receive a referral for a COVID-19 test can get tested for free, by appointment only at Atlantic City (3830 Atlantic Ave. Atlantic City, NJ 08401) with their Stockton ID.

- 3830 Atlantic Avenue
Atlantic City, New Jersey 08401
(609) 345-6000
Hours 8:30am-5:00pm Monday – Friday

COUNSELING CENTER SERVICES

Located in J-204-

Monday - Friday | 9:00am-5:00pm

(609) 652-4722 | wellctr@stockton.edu

Counselors at the Wellness Center have returned to campus and are here to help you. Please keep in mind that due to the pandemic, our counselors will continue providing virtual counseling services (via zoom or phone). In case of a psychiatric emergency or crisis, other meeting spaces may be explored.

- Walk-in/Crisis Services are still available Monday to Friday 9:00am-4:00pm via phone at 609.652.4722.
- Counseling groups and workshops will continue to run remotely via Zoom.
- If you have any questions, please call our office at 609-652-4722.

Disability Services- Learning Access Program

Located in J-204-

Monday - Friday 9:00am-5:00pm

(609) 652-4988 | lap@stockton.edu

The Learning Access Program staff have returned to campus and are here to help you. Please keep in mind that due to the pandemic, appointments will continue to be done virtually. For students that would like to schedule an appointment for new services, questions regarding current services, or additional concerns, LAP staff will be available Monday-Friday from 9:00am-5:00pm.

If you have questions or concerns, email your Coordinator below, the main office at lap@stockton.edu or you can call the office at 609.652.4988 or 609.441.2483.

**Continue to Practice
Healthy Habits!**

How can we prevent the spread?

- Wear your mask and stay 6 feet apart when in public spaces
- Avoid touching your eyes, nose and face with unwashed hands
- Cover coughs and sneezes with tissue or sleeve, not hands
- Wash hands often or use hand sanitizer when soap and water not available
- Stay home when sick
- Avoiding crowds and those who are sick

ACT NOW!

WEAR A MASK

STAY 6 FEET APART

AVOID CROWDS

Incubation period

- The time from when a person is exposed to when they develop symptoms
- For COVID-19 the incubation period is about 2 – 14 days
- Research suggests that a person with COVID-19 may be more likely to spread the virus 48 hours before symptom onset
- If someone is asymptomatic or if they are symptomatic and their symptoms go away, it's possible to remain contagious for at least 10 days after testing positive for COVID-19

What if I get sick?

- Seek medical care right away. Do not come to campus if you are ill
- Answer “No” to Stockton’s Health Pledge. Someone will call you and tell you the next steps to take.
- **CALL BEFORE** going to Health Services, a doctor’s office, an urgent care, or a hospital
- Avoid contact with others. Stay at least 6 ft apart
- Continue to wear your mask
- Stay home
- Cover coughs and sneezes
- Wash hands often or use hand sanitizer
- Disinfect frequently touched surfaces

Isolation vs. Quarantine

Isolation and quarantine help protect the public by preventing exposure to people who have or may have a contagious disease.

- **Isolation** separates sick people with a contagious disease from people who are not sick.
- **Quarantine** separates and restricts the movement of people who were exposed to a contagious disease to see if they become sick.

https://youtu.be/l3s75_X8Xjs

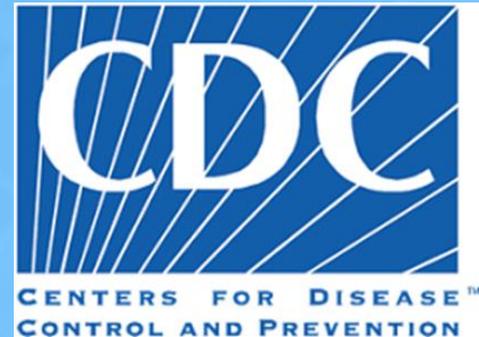

Given the high rate of community spread of COVID-19 throughout New Jersey, NJDOH continues to recommend quarantine for 14 days to reduce the risk of spread of COVID-19.

If staying home for 14 days would pose a significant economic hardship or burden, there are two acceptable options to shorten quarantine:

- o **No test option:** Quarantine can end after Day 10 without testing and no symptoms.
- o **Test option:** **Get tested between day 5-7 (not earlier than day 5).** Must quarantine at home until results are received and are negative. Quarantine cannot end earlier than Day 7. If the test result is delayed, quarantine should be continued until after Day 10.
- o Persons in quarantine should wear masks, social distance from others, and wash hands often.

CDC Guidelines:

- **Exposure/close contact:** being within 6 feet for at least 15 minutes (continuous or intermittent) over a 24-hour period (regardless of PPE) of a person who tests positive for COVID-19 while they were infectious (2 days before onset of symptoms to 10 days after).
- **Isolation:** when someone who is *infected* with COVID-19 is separated from non-sick people.
- **Isolation period:** usually defined as 10 days from the time symptoms began, or, if asymptomatic, 10 days from the date of the positive test, **and** Fever-free for at least 24 hours without fever-reducing medication, **and** improvement of any other symptoms
- **Quarantine:** when someone who has been *exposed* or *possibly* exposed to COVID-19 is separated from non-sick people. Quarantine is recommended for anyone who has been exposed to or had close contact with COVID-19, regardless of whether they are experiencing symptoms

Source: CDC

When to seek emergency medical attention

EMERGENCY

Look for **emergency warning signs*** for COVID-19. If someone is showing any of these signs, **seek emergency medical care immediately:**

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion
- Inability to wake or stay awake
- Bluish lips or face

*This list is not all possible symptoms. Please call your medical provider for any other symptoms that are severe or concerning to you.

Call 911 or call ahead to your local emergency facility: Notify the operator that you are seeking care for someone who has or may have COVID-19.

So how can I be prepared in case if I am exposed to someone with COVID-19 or become ill?

Photo by martin-dm/iStock

Build a Quarantine Bag

In addition to your clothes, books and electronics...

- Extra cell phone charger
- List of important people and their phone numbers written out
- List of any allergies (foods and meds)
- Two or more extra changes of comfy clothes: sweats, PJs, tees, fuzzy socks
- Fleece throw
- Personal hygiene items (soap, lotion, toothbrush, etc.)
- Hair supplies (comb, brush, shampoo, etc.)
- Thermometer
- Cough Drops
- Vitamins C, D-3, Zinc, B-12
- Ibuprofen and/or acetaminophen (for fever and body aches) – some have found alternating the two to be effective, but discuss with your provider
- Vapor Rubs
- Prescription medications (optional over the counter cough & chest congestion)
- Tissues
- Snacks
- Tea bags & honey (warmth helps to open airways)
- Electrolyte balancing powdered drink to mix in water
- Masks
- Entertainment: playing cards, books, puzzles, adult coloring book, etc.

How to clean your home/room if someone has COVID-19

<https://www.youtube.com/watch?v=KHCryOGkLMM>

Continue to wear your mask

Source: CDC

The do's and don'ts of wearing a mask

Coronavirus Disease 2019

COVID-19

What you need to know to keep your family safe and healthy.

WEAR THIS
CLOTH FACE COVERING

NOT THAT
FACE COVERING WITH VALVE

Some face coverings have a plastic valve embedded in the fabric. This is a one-way valve which prevents some pathogens from entering but does not prevent them from leaving when you exhale. When you wear a face covering with a valve, most of what you're exhaling is unfiltered, and you're potentially putting others at risk for the spread of COVID-19.

www.tricare.mil/coronavirus

How to take off a mask

How to take off a mask

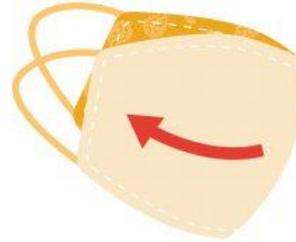

1

Carefully, untie the strings behind your head or stretch the ear loops

2

Handle only by the ear loops or ties

3

Fold outside corners together

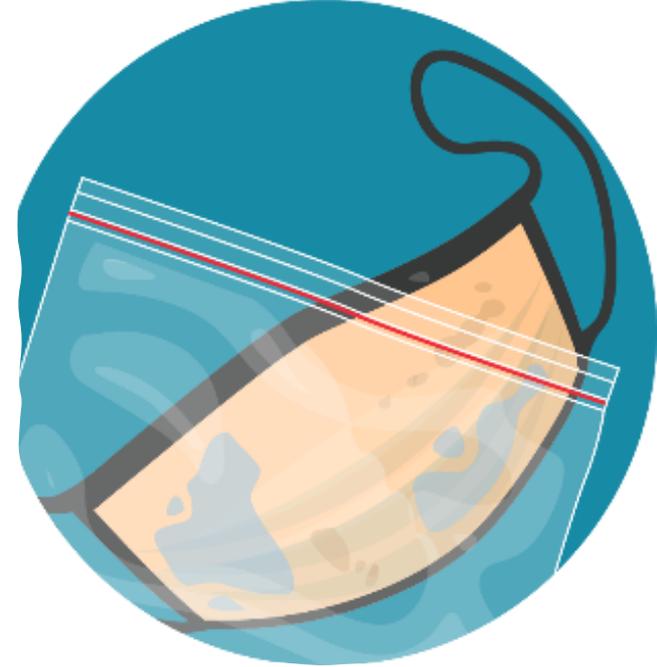

4

Be careful not to touch your eyes, nose, and mouth when removing and wash hands immediately after removing

Source: CDC

How to store your mask

- Store wet or dirty masks in a plastic bag
- Store masks that are not wet or dirty in a paper bag

Source: CDC

Laundry or wash by hand

- Wash your mask with tap water and laundry detergent or soap.
- Rinse thoroughly with clean water to remove detergent or soap.

Source: CDC

How to dry

Dryer

- Use the highest heat setting and leave in the dryer until completely dry

Air dry

- Lay flat and allow to completely dry. If possible, place the mask in direct sunlight

Source: CDC

Travel

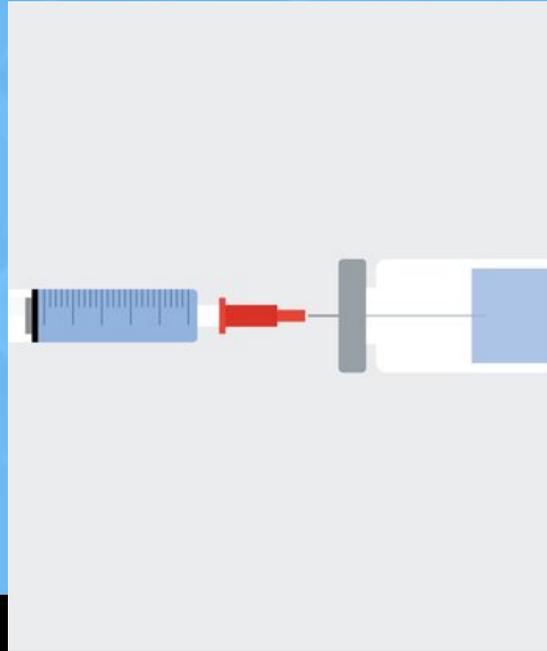

NOTICE TO TRAVELERS: New Jersey strongly discourages all non-essential interstate travel at this time. Travelers and residents returning from any U.S. state or territory beyond the immediate region (New York, Connecticut, Pennsylvania, and Delaware) should self-quarantine at their home, hotel, or other temporary lodging for 10 days if they are not able to get tested or 7 days if they test negative. For more information, visit [covid19.nj.gov/travel](https://www.covid19.nj.gov/travel).

Effective January 26, 2021, the CDC is requiring all air passengers entering the United States from a foreign country to test negative for COVID-19. Travelers are required to get tested within the 3 days before their flight to the U.S. departs, and provide written documentation of their test results to the airline or provide documentation of having recovered from COVID-19. For more information, visit the CDC website.

COVID VACCINES-

FDA has authorized the emergency use for two vaccines:

- The Pfizer-BioNTech COVID-19 vaccine is recommended for persons 16 years of age and older
- The Moderna vaccine is recommended for individuals 18 years and older.
- Not all sites administer both vaccines, so it is important to check with your vaccination site before scheduling a visit to ensure you are eligible.

NJ Vaccine Scheduling System

HOTLINE:

855-568-0545

8:00 a.m. to 8:00 p.m.

Online:

Covid19.nj.gov/vaccine

Low Supply- High Demand

As of January 14, 2021, the following groups are eligible for the COVID-19 vaccine:

- ✓ Paid or unpaid persons working or volunteering in a healthcare setting
- ✓ Residents of long-term care facilities and other congregate settings
- ✓ Frontline first responders
- ✓ Persons aged 65 and older
- ✓ Persons aged 16 to 64 years old who have at least one chronic medical condition that poses high-risk for severe COVID-19

These groups can start making vaccination appointments.

More groups will become eligible in the coming weeks.

For a list of open vaccination sites nearest to you and register for a COVID-19 vaccine visit

Coping with Stress During COVID

Find your happy place.

TIPS TO REDUCE COVID-19 STRESS

- 
- 1. Focus on what you can control** – including your thoughts, behaviors.
 - 2. Remember that you are resilient**, and so is humankind. We will get through this.
 - 3. Do what you can to reduce your risk;** take comfort that you are caring for yourself and others.
 - 4. Use technology to connect with others** frequently.
 - 5. Look for the good stuff;** the helpers, time with family, and opportunities to pull together. Write down three things you are grateful for each day.
 - 6. Limit exposure to news** or social media updates.
 - 7. Use reputable sources** of news, avoid speculation and rumors.
 - 8. Model peaceful behavior** for those around you. Remember everyone experiences stress in different ways.
 - 9. Don't let fear influence** your decisions, such as hoarding supplies.
 - 10. Be gentle** with yourself and others.
 - 11. Create a regular routine**, especially for children and work from home.
 - 12. Maintaining a healthy diet** and **exercise** routines to help your immune system and mental health.
 - 13. Spend time in nature** while adhering to social distancing guidelines.
 - 14. Reflect on your reactions.** Many who have experienced trauma may be triggered by feelings of powerlessness. Understanding what you are feeling can help you consider how you want to respond to the triggers.
 - 15. Practice meditation**, yoga, or other mind-body techniques. Find apps or online videos to help.
 - 16. Reach out if you need to talk.** There are local and national hotlines and warmlines that can help!
